INDUSTRIAL EXPERIENCE

Capital Numbers, Kolkata

React Native Development (2 Months)

Designed and built an industry level Job Searching and Posting App (JobFinder) utilizing React Native and Firebase.

ACADEMIC PROJECTS

1Password — UI Design

Collaborated with my team to enhance the user interface of 1Password, a password manager application. Utilized Figma to design and prototype a visually appealing interface that incorporates essential features. Improved the overall user experience in managing passwords and private data within the application.

Vibrance App — App

As a member of the Android Club and the App Development team for our cultural event I contributed to creating an all-in-one app that provides a one stop information about the event. Features we included are information about various events and event registration, purchasing merchandise etc. React Native was used to design the navigation bar for the app.

Emerald Airlines

Developed an Airline Management System using Python programming language. Implemented user account creation and travel detail specification, allowing users to input date, time, and destination information for their journey. Enhanced functionality by providing users with the option to select preferred seats and airline meal choices. Integrated ticket generation and ticket cancellation features for a comprehensive user experience.

PASSION PROJECTS

Black and White Photo Generator

Developed a customized program utilizing OpenCV and Python to interact with the user's camera. Implemented functionality to capture the user's image with a programmable delay, perform real-time black and white image conversion, and subsequently save the image as a high-quality JPEG file on the user's local system.

AnimeVerse — App

AnimeVerse is an all in one app developed to know everything about anime and keep a track of your favorite anime. It is built using React native, Jikan Api and Firebase.

EDUCATION

Vellore Institute of Technology, Chennai — B.Tech
